

The Art & Science of Grant Funding

A Grants Training Mini-Series for the College of Arts and Sciences

In four one-hour workshops, the **Proposal Development Office** will explore unexpected routes to grant funding for UK's A&S researchers. Find out how best to engage with each agency, learn about successful past projects, and come away with actionable tips to get started.

Monday
Mar 9
2:00pm

Intro to Department of Defense (DOD)

DOD's role in funding research is often misunderstood. In this session we'll demystify DOD, covering facts vs. myths of how DOD funds research, as well as what's been changing.

Chemistry & Physics Building, room 179

Tuesday
Mar 24
2:00pm

Foundation Funding

Private foundations present a promising alternative to federal funding, but have some key differences. We'll discuss what you need to know to pursue these opportunities.

Patterson Office Tower, room 245

Friday
Apr 3
2:00pm

Intro to National Institutes of Health (NIH)

Even if you're not a biomedical scientist, learn how your work may be of interest to this important agency. We'll cover the different grant types and where your research might fit in.

Jacobs Science Building, room 114

Thursday
April 23
2:00pm

NSF for the Social Sciences

We'll explore routes to funding through the National Science Foundation (NSF) with special focus on social sciences disciplines like psychology, sociology, and economics.

Patterson Office Tower, room 245
